Subject: 2014 319 Grant Process

Hello

This is just an FYI that the request for proposals for DEQ's 319 Grant program has opened and the pre-proposal application information for the 2014 grant program is available on our website at: <http://www.deq.state.or.us/wq/nonpoint/grants.htm>.

The deadline for submissions is 5:00 pm, January 10, 2014.

The application form currently available online is NOT fill-able (sorry if this sounds familiar). DEQ is working to get a fill-able form posted as soon as possible. I will send out an email when that happens. In the meantime, please use the posted form as a template to guide your application. You will be able to copy-paste your text into the fill-able form. If you have any problems with the form or questions on the RFP, please let me know.

Please call me or your basin coordinator (Table 3 in the application form) to discuss any project proposal ideas before submitting an application. There is no guarantee that your project will be reviewed if you do not contact the Basin Coordinator or 319 Coordinator before submitting a proposal.

You can email your pre-proposals directly to me at dombrowski.tonya@deq.state.or.us or mail or deliver a hard copy to me at 700 SE Emigrant Ave. Suite 330, Pendleton, OR 97801. PLEASE CALL ME if you are planning to submit an application by email so that I can watch for it and let you know if it does not arrive.

I would be happy to discuss project ideas and/or review any pre-proposals you are working on prior to the 10th. Just give me a call or email.

Again, sorry for the not-fill-able form. We will get this right eventually. Thanks for your patience!

I hope you all have a happy holiday!

Tonya
